**The Most Important
Things to our Business:
Our Customers, Our
People & Our Reputation**

ABOUT US

The Wulguru Group is a privately owned Australian steel fabrication company. Our core business is providing innovative engineering and design solutions. With unrivalled technology, capacity and infrastructure Wulguru Steel has become one of the largest steel fabrication companies in Northern Australia.

Established in 1976, the Wulguru Group has a long and successful history of servicing the food processing industry within Australia and overseas. Staff with extensive years of industry experience are the key to the company's success.

Wulguru Steel and Archimedes Engineering were originally established to service the food processing industry. The Wulguru Group specialises in abattoir design, product handling, sheetmetal / stainless steel fabrication and site based works.

We offer a complete range of services with our three workshop locations, control of all stages from design, fabrication, installation and transport. The Wulguru Group prides itself on exceptional customer service and is committed to its promise to deliver, quality, on site, on time.

QUALITY ASSURED COMPANY BY AS/NZS ISO 9001:2008
OH&S SYSTEM CERTIFIED BY AS/NZS 4801:2001

FOOD PROCESSING

We can advise on plant and process layout, construction, operational management and can project manage the total installation.

Wulguru Steel offers 36 years of knowledge and experience in the food processing industry.

We have the capabilities for design and manufacturing of equipment for many applications including the Meat Industry, Dairy, Seafoods, Grainfood & Bakeries, Sugar, etc.

Wulguru Steel also provides a

technology transfer service which encompasses:

- Plant design and layout
- Project management
- Mechanical services design
- Refrigeration plant design
- Electrical services design
- Marketing
- Maintenance
- Energy surveys and usage monitoring

We are able to provide personnel with many years experience with hands-on operational experience in the food industry.

Through our diverse range of contacts in the Food Industry a range of experts can be placed in a food processing plant to train new staff in the functions of modern Food Industry Plant Management.

PRODUCT HANDLING

Archimedes Engineering specialises in the design and manufacture of Screw Feeders and Conveyors, Bucket Elevators and Mixers.

Archimedes Engineering has established itself as an industry market leader, respected for its commercial and quality management policies and has earned an enviable reputation for integrity and reliability.

We have managed projects both nationally and internationally and worked with all major engineering consultants. Our equipment has been designed and supplied to PNG, Vietnam, Indonesia, Middle East & Pacific Islands for a wide range of industry uses.

Our solutions include:

- Conveyor systems
- Chain & belt bucket elevators
- Mixers & grease mixers
- Material handling equipment
- Storage bins
- Post hole augers
