ABOUT US

The Wulguru Group is a privately owned Australian steel fabrication company. Our core business is providing innovative engineering solutions. With unrivalled technology, capacity and infrastructure Wulguru Steel has become one of the largest steel fabrication companies in Northern Australia.

Archimedes Engineering also forms part of the Wulguru Group and is a specialist manufacturer and supplier of screw conveyors, bucket elevators and material handling equipment and systems.

Established in 1976, the Wulguru Group has a long and successful history of servicing the sugar industry in Queensland and New South Wales. Staff with extensive years of industry experience are the key to the company's success.

We offer a complete range of services with our three workshop locations, control of all stages from design, fabrication, installation and transport. The Wulguru Group prides itself on exceptional customer service and is committed to its promise to deliver, quality, on site, on time.

SUGAR PROCESSING

Our main workshop is centrally located in the country's largest sugar producing regions (Burdekin & Herbert).

We have in-house expertise in the design and fabrication of pressure vessels, tanks, screw conveyors, bucket elevators, all processing equipment, and raw and processed material transportation.

We also have experience with carbon and stainless steels as well as aluminium and exotic metals.

Our experienced site crews have the ability to meet tight timeframes to ensure mill production is not compromised.

We have developed long term relationships with clients such as Qld Sugar Ltd, Mackay Sugar, Wilmar, MSF, Sucrogen, Bundaberg Sugar and NSW Sugar.

PLANT & EQUIPMENT

With workshops in Townsville, Brisbane and Charters Towers, Wulguru Group is well situated to service the sugar processing industry. The group internally controls all cutting, folding, welding, blasting, painting and transport without the need to rely upon external contractors. Our facilities are capable of producing in excess of 4000 man hours per week.
